Summary

A Computer Science Engineering student with strong expertise in backend development using Java and Spring Boot. Experienced in designing and developing scalable RESTful APIs, optimizing database performance, and building robust server-side applications. Proficient in core Java concepts including collections, multithreading basics, and OOP principles, with a solid understanding of SQL databases and system design fundamentals.

Education

B.Tech in Computer Science Engineering

Chitkara University, Rajpura, Punjab

CGPA: 8.72

2023 – Present

12th Grade (PCM)

Mukand Lal Public School, Yamunanagar, Haryana

CGPA: 7.88

2023

Technical Skills

Programming Languages: Java, JavaScript, SQL

Backend & Full Stack: Spring Boot, Node.js, Express.js, React

Core CS: DSA, OOPS, DBMS, OS, Computer Networks

Databases: MySQL, MongoDB

Tools: AWS, Git, GitHub, Linux, Postman, VS Code

Technical Projects

CU Campus – *University Portal*

Spring Boot, React, MySQL

- Developed scalable REST APIs using Java Spring Boot for complaint and gatepass management modules, ensuring modular and maintainable backend architecture
- Implemented JWT-based authentication and role-based access control (Student/Warden) to secure endpoints and prevent unauthorized access
- Designed and optimized MySQL schema with efficient joins and indexed queries to improve data retrieval performance
- Improved API reliability by implementing robust input validation, exception handling, and debugging production-level failures

Career Compass – *Career Guidance Platform*

Node.js, React, MySQL

- Engineered a full-stack career guidance platform with 8+ relational tables managing users, courses, enrollments, and payments
- Implemented JWT-based authentication ensuring secure user flows.
- Designed a personalized career recommendation system based on quiz-driven analysis (interests, strengths, preferences)
- Built a course marketplace with payment integration and enrollment lifecycle tracking (active/completed)
- Developed visual career roadmaps (Mermaid) according to the streams that user will choose and a structured resource library for skill- and exam-based guidance

Achievements & Certifications

IEEE Toastmasters Club; enhanced public speaking, leadership, and technical communication by participating in group discussions.

Participated in the **Adobe India Hackathon**, collaborating on innovative software solutions.

Competed in university-level **badminton tournaments**, demonstrating teamwork and discipline.

Completed certifications in **Introduction to Agile Development (Coursera)** and **Full Stack MERN (ThingQbator)**.
